

discover • develop • operate

Imperial Metals holds a superior portfolio of operating mines and development projects located primarily in British Columbia. Two operating mines, Mount Polley (100%) and Huckleberry (50%), provide the cash flow to continue to fund the Company's exploration and development programs. At Imperial's flagship development property, Red Chris, the copper and gold resources outlined are approaching 10 billion pounds copper and 15 million ounces gold. With significant exploration programs at Red Chris, Mount Polley, Ruddock Creek and Catface, Imperial spent more than any other company on mineral exploration in British Columbia in 2010.
