NOTES:

(1) stated as 50% (allocable to Imperial)

(2) Mill Head Value (MHV) is a calculation of the value of material mined, in Canadian dollars per metric tonne, once it reaches the Crusher Pocket.

This includes all downstream costs from the crusher forward, including: Milling / Concentrate handling and transportation / Treatment and refining / Royalties / Sustaining capital / Administration and head office overhead costs.

Large capital costs associated with expansions, such as mining fleet additions, or replacements are not included. See table 17.24 in the Technical report available on this site for metal recovery formulas, costs and parameters used to calculate this value.

(*) reserve & resource data confirmed by Qualified Person as provided in 43-101 reports. Refer to Company website or www.sedar.com for the reports.
